BELMONT
FORUM

Since 2021, the Sustainability Research & Innovation Congress (SRI) has united global leaders in **research, government, civil society, and business to meaningfully advance progress towards sustainability**. The SRI Congress offers an exceptionally inclusive and inspiring global platform for co-creating state-of-the-art solutions and innovations and building a coalition of the willing to achieve a sustainability transformation. SRI is co-convened by Future Earth and the Belmont Forum and co-organized with local hosts.

SRI has been held in Oceania, Africa, and Latin America, and is now heading to Europe. In 2024, SRI will be organized in collaboration with Sustainability Science Days (SSD), which for over six years has been the largest sustainability science conference in Finland. SSD is a joint collaborative effort between Finland's two largest universities, the University of Helsinki, and Aalto University.

SRI2024 WILL BRING TOGETHER 2000+ PARTICIPANTS FROM MORE THAN 100 COUNTRIES ONLINE AND IN-PERSON WITH EVENTS ON BOTH CAMPUSES IN HELSINKI AND ESPOO

& events

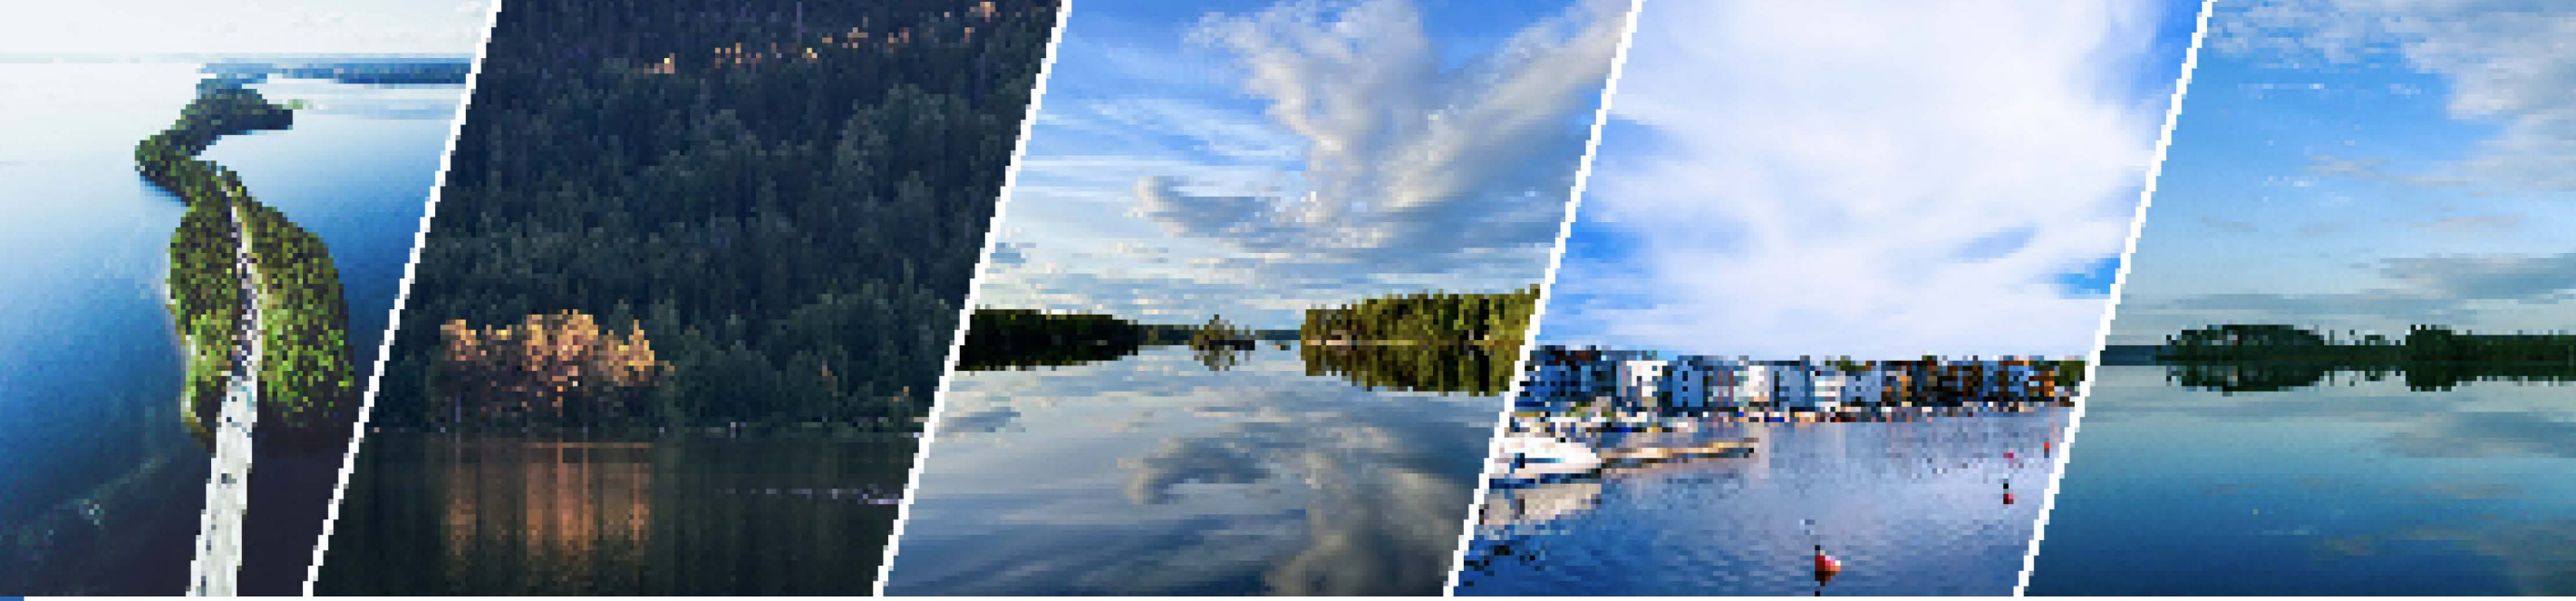

100+
countries

"At the University of Helsinki we believe passionately that with the power of scientific knowledge and boundary breaking collaboration, we create a fairer, healthier and more sustainable world. We are thus very pleased to co-organize the next SRI congress in Finland, in a country known to be small in population size, but big in ideas, innovation and equality." - Tom Böhling, University of Helsinki's Vice-Rector for Sustainability and Responsibility.

TOM BÖHLING, UNIVERSITY OF HELSINKI'S FORMER VICE-RECTOR FOR SUSTAINABILITY AND RESPONSIBILITY

The Congress will include Satellite Events in other regions to offer different perspectives and accommodate timezones.

The fully hybrid SRI2024 will engage a diverse audience around an interactive and engaging program emphasizing learning, networking and innovation and seeking inclusive and novel pathways to move knowledge to action. All events will be recorded for later viewing and reuse.

76% OF SRI2023 SURVEY RESPONDENTS SAID THEY MADE NEW INTERNATIONAL CONNECTIONS THAT MIGHT LEAD TO COLLABORATION IN THE FUTURE

SRI2024 will be an excellent opportunity for:

- Forging new collaborations, expanding networks, and connecting with new markets
- Engaging with the leading experts in the field and the world's largest platform of transformative research funding
- Translating research into action through Idea Market and the Carbon Drawdown Prize
- Connecting with a diverse group of stakeholders about needs and priorities
- Exploring the latest sustainability science research and testing innovative products
- Positioning organizations alongside other key actors

"Building a sustainable future is at the core of all activities. We are very happy that we can join forces and bring together researchers and different stakeholders for Finland's largest sustainability science conference. We need sustainability science, research and innovations now more than ever."

OSSI NAUKKARINEN, AALTO UNIVERSITY'S VICE PRESIDENT FOR RESEARCH
